Regierungs-CIO, Estland
19-21 Strategieleiter, Guardime SA
10-18 Öffentlicher Dienst, Estland & Europäische Kommission
2009-10 Militärdienst - Luftverteidigung

DISCLAIMER: Ich präsentiere ausschließlich meine persönliche Ansichten

Agenda

1. The eIDaS trinity
2. Uptake
3. eID and the agentic future

The e-ID trinity

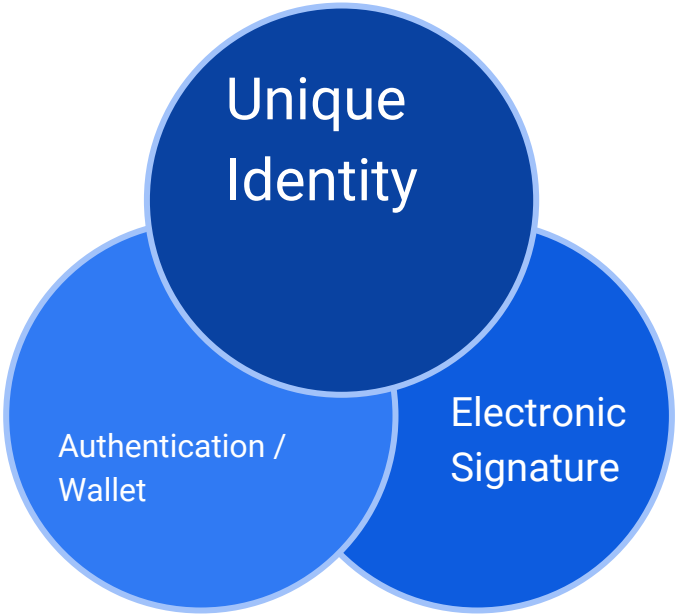
In order to achieve:

Inside administration:

- Once only and data minimization
- Proactive services
- Personal data / consent tracking

Across public and private lines:

- Frictionless and collaborative health, financial services, energy, transport etc… services
- Fully paperless AND PDF/FORM-FREE flows



A formula for uptake

eID uptake =

- Use by private sector (esp financial services)
- ID ecosystem provider(s) with revenue tied to volume
- Gov’t orchestration of trust, ecosystem management

Some positive exceptions of gov’t only eID:

- Netherlands
