What is a Participation Meeting?

- An accessible, informal format
- The e-ID programme provides updates to encourage feedback and motivate the ecosystem to put the solutions into practice
- External contributors are welcome to present new, concrete topics of interest to a broad audience. Please refrain from sales pitches
- Suggestions can be submitted via GitHub or to info@swiyu.admin.ch

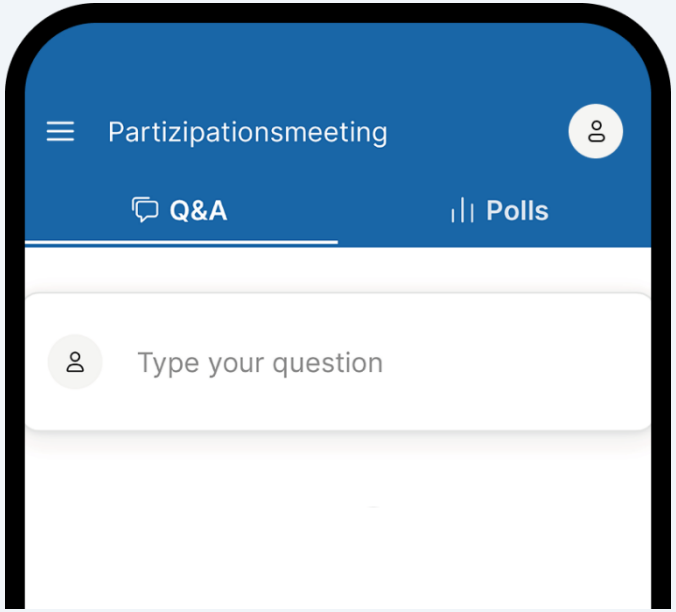

Agenda

- Welcome and agenda
- swiyu: general status update and outlook
- swiyu tools
- swiyu.admin.ch
- Studi VC Lighthouse Project: Student Credential
- Questions from the audience

Available information resources

- Please make use of the information we provide!
  - https://swiyu.admin.ch
  - https://www.youtube.com/@swiyu-admin-ch
  - https://github.com/swiyu-admin-ch
- Please ask specific questions via chat – they will be answered via chat.
- We do not engage in political discussions here.

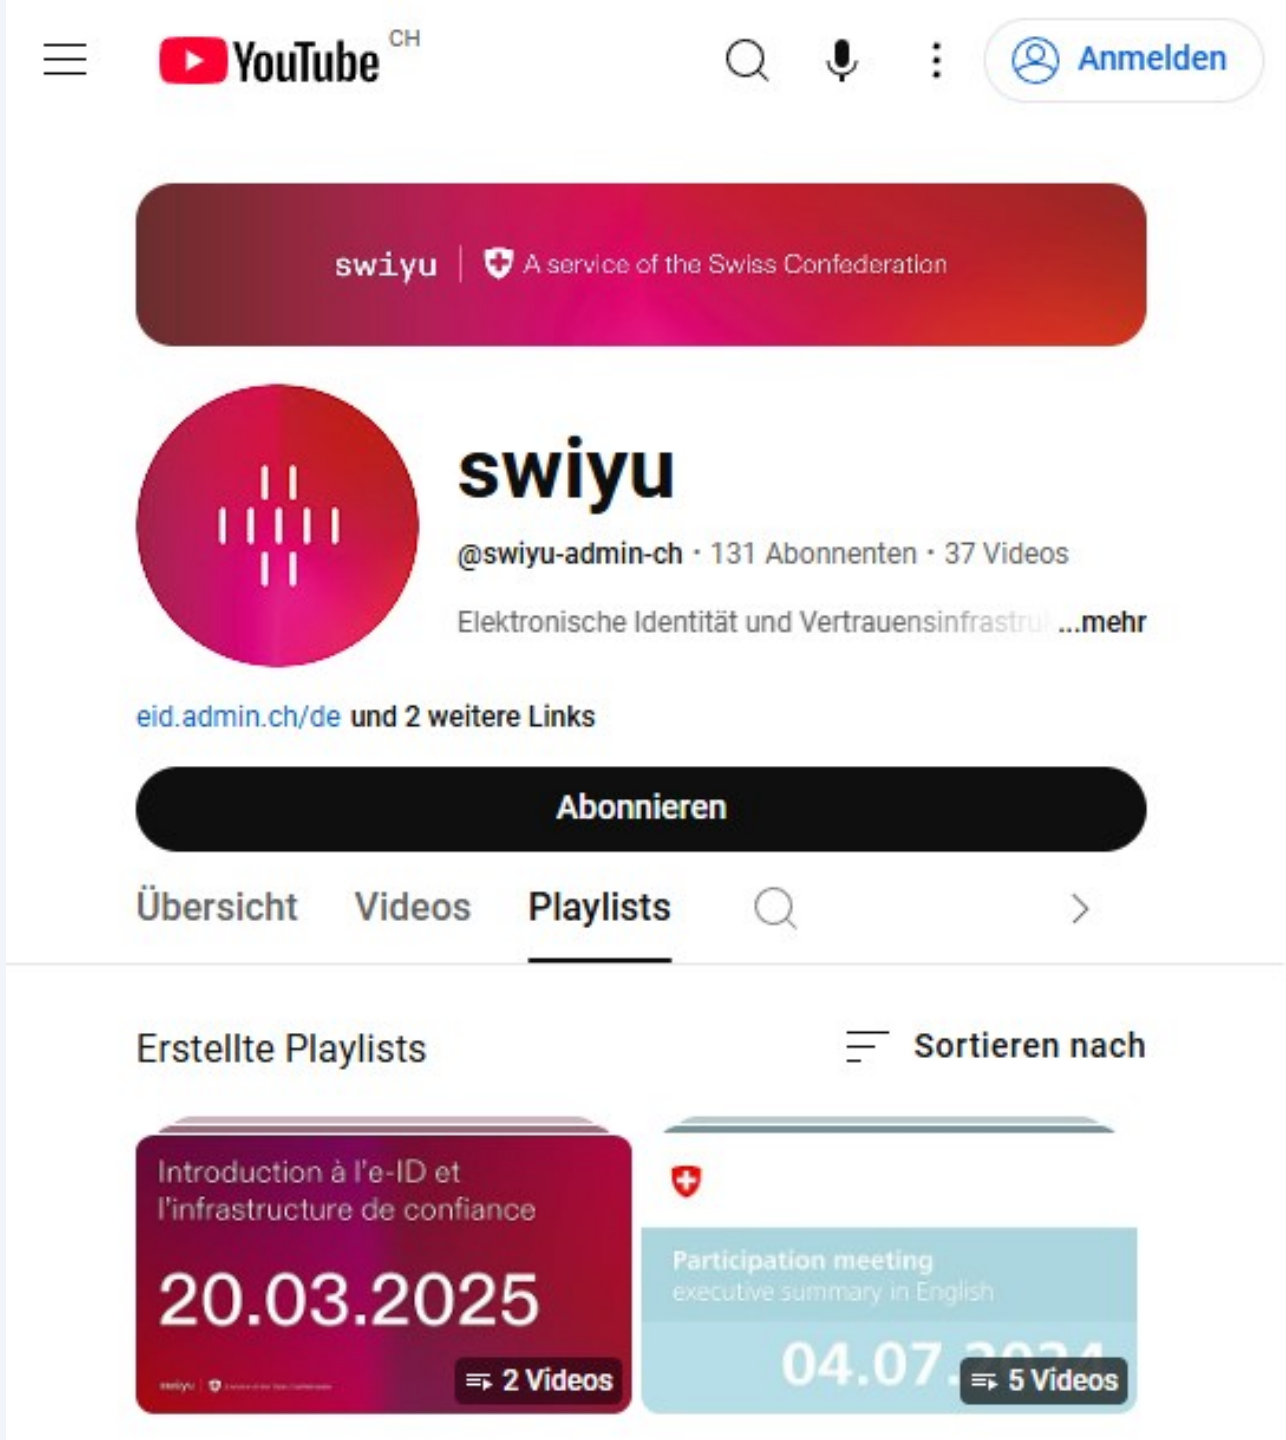

Ask questions!

Medienmitteilung | Veröffentlicht am 30. Juni 2026

Neuer Zeitplan für die Einführung der E-ID und der Vertrauensinfrastruktur

Bern, 30.06.2026 — Neueste Entwicklungen im Bereich der künstlichen Intelligenz bringen zusätzliche Herausforderungen für die Erstellung einer elektronischen Identität (E-ID) mit sich. Damit der Datenschutz und die Sicherheit der Nutzerinnen und Nutzer gewährleistet bleiben, braucht es Weiterentwicklungen, welche die Einführung der E-ID zeitlich verzögern. Der Sicherheitsaspekt ist höher zu gewichten als die Einführung zum ursprünglich genannten Zeitpunkt. Unabhängig davon wird die Vertrauensinfrastruktur ihren Betrieb voraussichtlich im ersten Halbjahr 2027 aufnehmen können.

What does this mean for swiyu?

In the first half of **2027**:

- Partial entry into force of the **Federal Act on Electronic Identification and Other Electronic Credentials** (e-ID Act)
- Launch of the **trust infrastructure**

- **Registration in the Base Registry** will be open to everyone
- **Registration in the Trust Registry** will be open to all Swiss public authorities and legal entities with a UID
- The **swiyu Wallet** will be available
- **Other electronic credentials** can be issued and verified (for example, the electronic driving licence for new drivers)
- Previously issued **electronic driving licences (eLFA)** will continue to work
- **Test credentials** issued in the Public Beta environment will no longer work. New test credentials must be issued to the “swiyu Sandbox Wallet” in the “swiyu Sandbox” environment. This is already possible today.

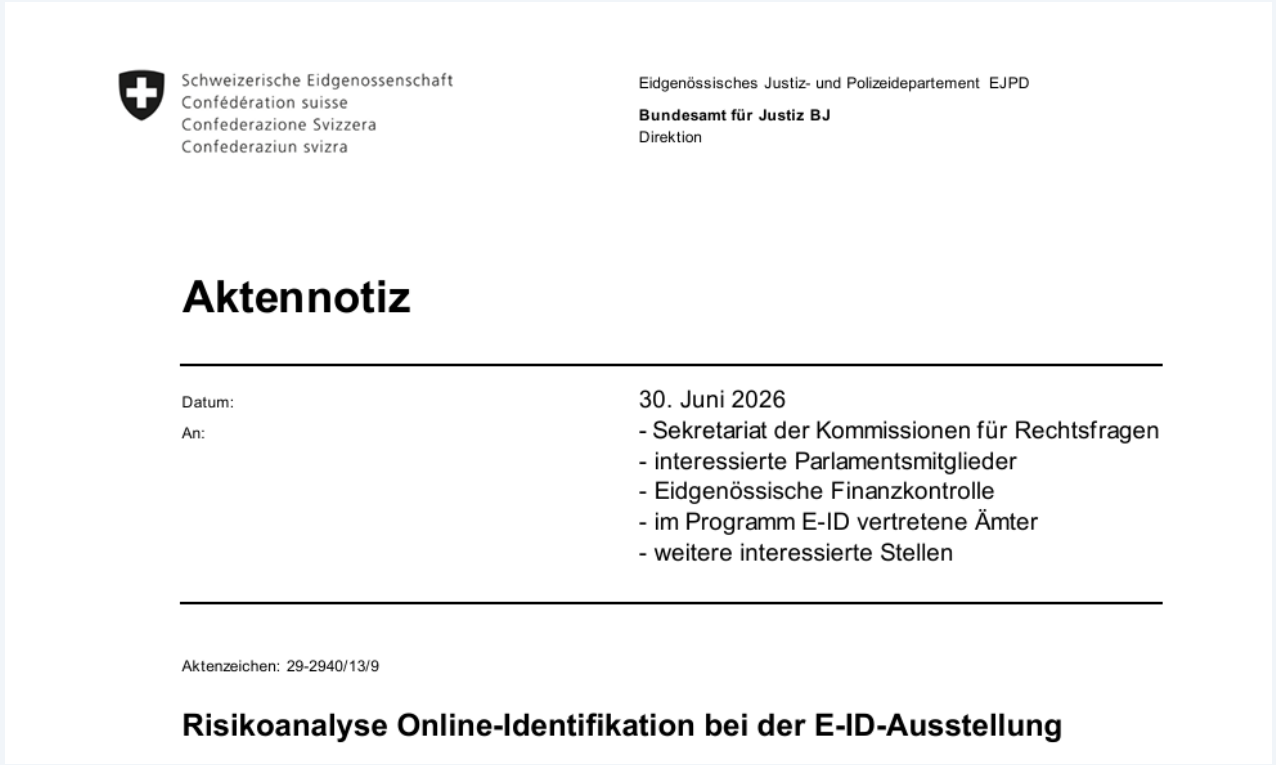

What does this mean for the e-ID?

The latest developments in **artificial intelligence** (AI) present additional challenges for issuing the e-ID. The Federal Office of Justice (FOJ) has therefore decided to **further strengthen the security of the online issuance process**. Additional technical measures are intended, for example, to make it more difficult to introduce malware onto users' devices and to improve the detection of deepfakes.

The proposed solutions are currently being further consolidated by an interdepartmental working group led by the FOJ. However, the necessary adjustments will take time, which is why the introduction of the e-ID is being postponed. The FOJ is also currently assessing the impact on resource requirements.

Progress update and next steps

The **interdepartmental working group**, led by the Federal Office of Justice (FOJ), has started its work.

A **survey was also conducted among all cantons**. The aim was to find out where they currently stand regarding in-person identity verification and what they are planning in this area.

The results will be communicated as soon as possible.

Review and outlook: Webinars for cantons and municipalities

Target audience: Administrative staff from the Confederation, cantons, cities and municipalities whose work involves areas such as e-government, online public service portals or digitalisation projects. No prior knowledge is required.

Format: 30-minute introduction to the e-ID and trust infrastructure, followed by a 30-minute Q&A session.

Dates and registration:

• 29.09.2026	DE	completed	>250 participants
• 30.09.2026	FR	completed	>150 participants
• 05.10.2026	DE	completed	>300 participants
• 09.11.2026	DE	Places available	>600 registered
• 13.11.2026	FR	Places available	>250 registered
• 23.11.2026	IT	Places available	>20 registered
• 25.11.2026	DE*	Places available	>60 registered
• 26.11.2026	IT	Places available	>10 registered
• 30.11.2026	FR*	Places available	>40 registered

**Advanced sessions: For participants who are already very familiar with the swiyu trust infrastructure.*

Review and outlook: Roundtables

DIDAS Launchpad: Connecting existing initiatives, knowledge and stakeholders and building on them. More information at www.didas.swiss/ecosystem/launchpad/

Past roundtables:

• Retail (age verification)	01.07.2026	>50 participants
• Education	27.08.2026	>30 participants
• Mobility	28.09.2026	>20 participants
• Insurance	27.10.2026	>20 participants

Upcoming roundtables

• Health	*Date to be confirmed*
• Banking	*Date to be confirmed*
• Sport	*Date to be confirmed*
• Other topics?	

Interested? Please contact us at ecosystem@swiyu.admin.ch or reach out directly to DIDAS Launchpad at launchpad@didas.swiss.

Job vacancy: Head of e-ID

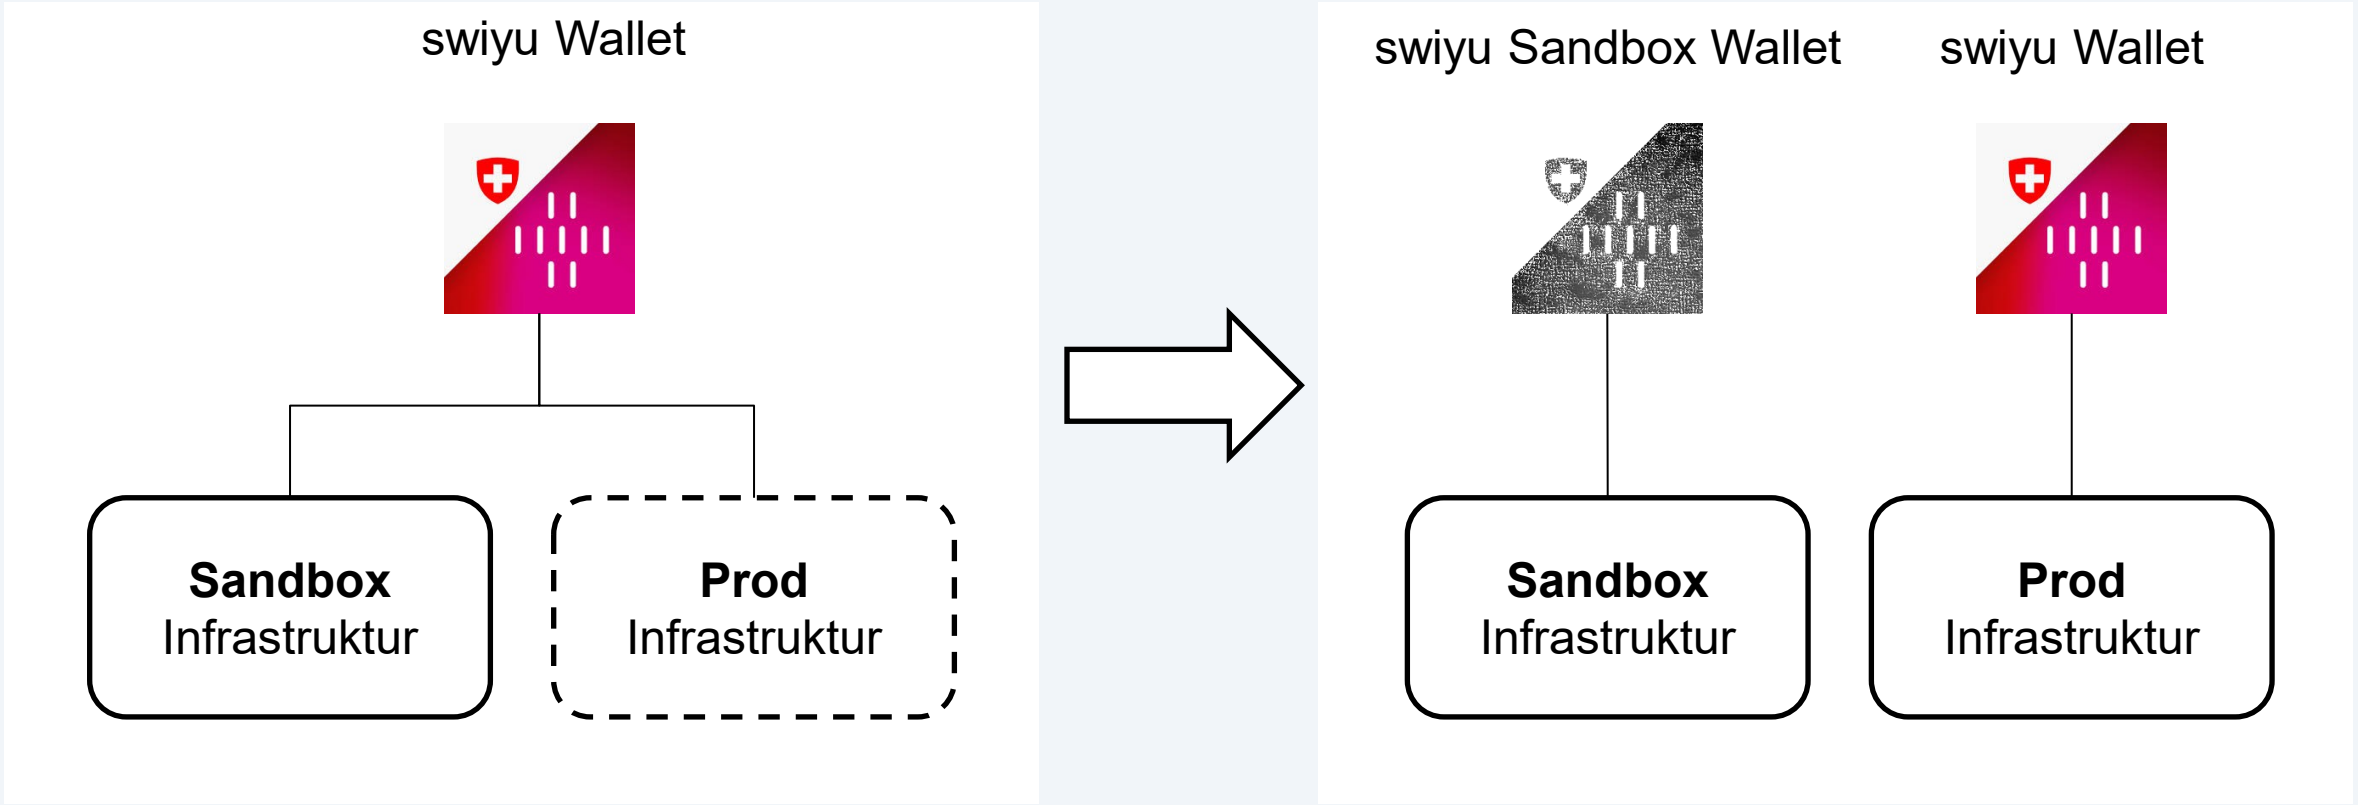

- Urs Paul Holenstein will retire next year
- His position will therefore be filled through a public recruitment process, in accordance with the Swiss Confederation's principles
- This change will have no impact on the e-ID project or the existing team. The leadership transition is being planned to ensure that the current position holder can provide a thorough handover and induction for his successor
- The new Head of E-ID will take over leadership of the e-ID specialist unit on 1 July 2027. The unit currently consists of 12 people
- We look forward to receiving your application! Job vacancy

Separation of the Sandbox and production environments in mid-November 2026

swiyu Wallet clean-up with version 2.0

- Version 2.0 of the swiyu Wallet and swiyu Sandbox Wallet will be released in mid-November
- With the separation of the environments, test credentials (from Public Beta/Sandbox) will be deleted from the swiyu Wallet
- Affected users will receive a one-time notification in the app
- If you wish to continue testing your application, credentials must be reissued to the swiyu Sandbox Wallet in the Sandbox environment
- If you have not already done so, you must complete the “Trust Onboarding” process in the Sandbox
- Instructions are available at https://swiyu-admin-ch.github.io/change-dossiers/
- Production credentials (eLFA) will remain in the swiyu Wallet.

swiyu tools

swiyu Test Applications

The Swiss Confederation provides two test applications to help you test your application or credentials:

https://github.com/swiyu-admin-ch/swiyu-generic-application-test

- Designed for end-to-end testing of the generic swiyu components.
- Validates issuance and verification flows without relying on the full trust infrastructure or real wallets.

https://github.com/swiyu-admin-ch/swiyu-generic-test-wallet

- Simulates a wallet to test credential issuance and verification flows.
- Validates your deployments of the generic components.
- Makes the different protocol steps visible and helps identify errors in configuration, metadata or at the protocol level.

Applications from the swiyu Community

Other useful applications developed by the swiyu community:

- swiyu Trust Registry Explorer: https://www.trustexplorer.ch/
- VCT Editor: https://vct-editor.unxos.ch/
- Credential Toolkit: https://credential-toolkit.vercel.app/

➔ These applications have been developed by private parties and are operated outside the trust infrastructure.

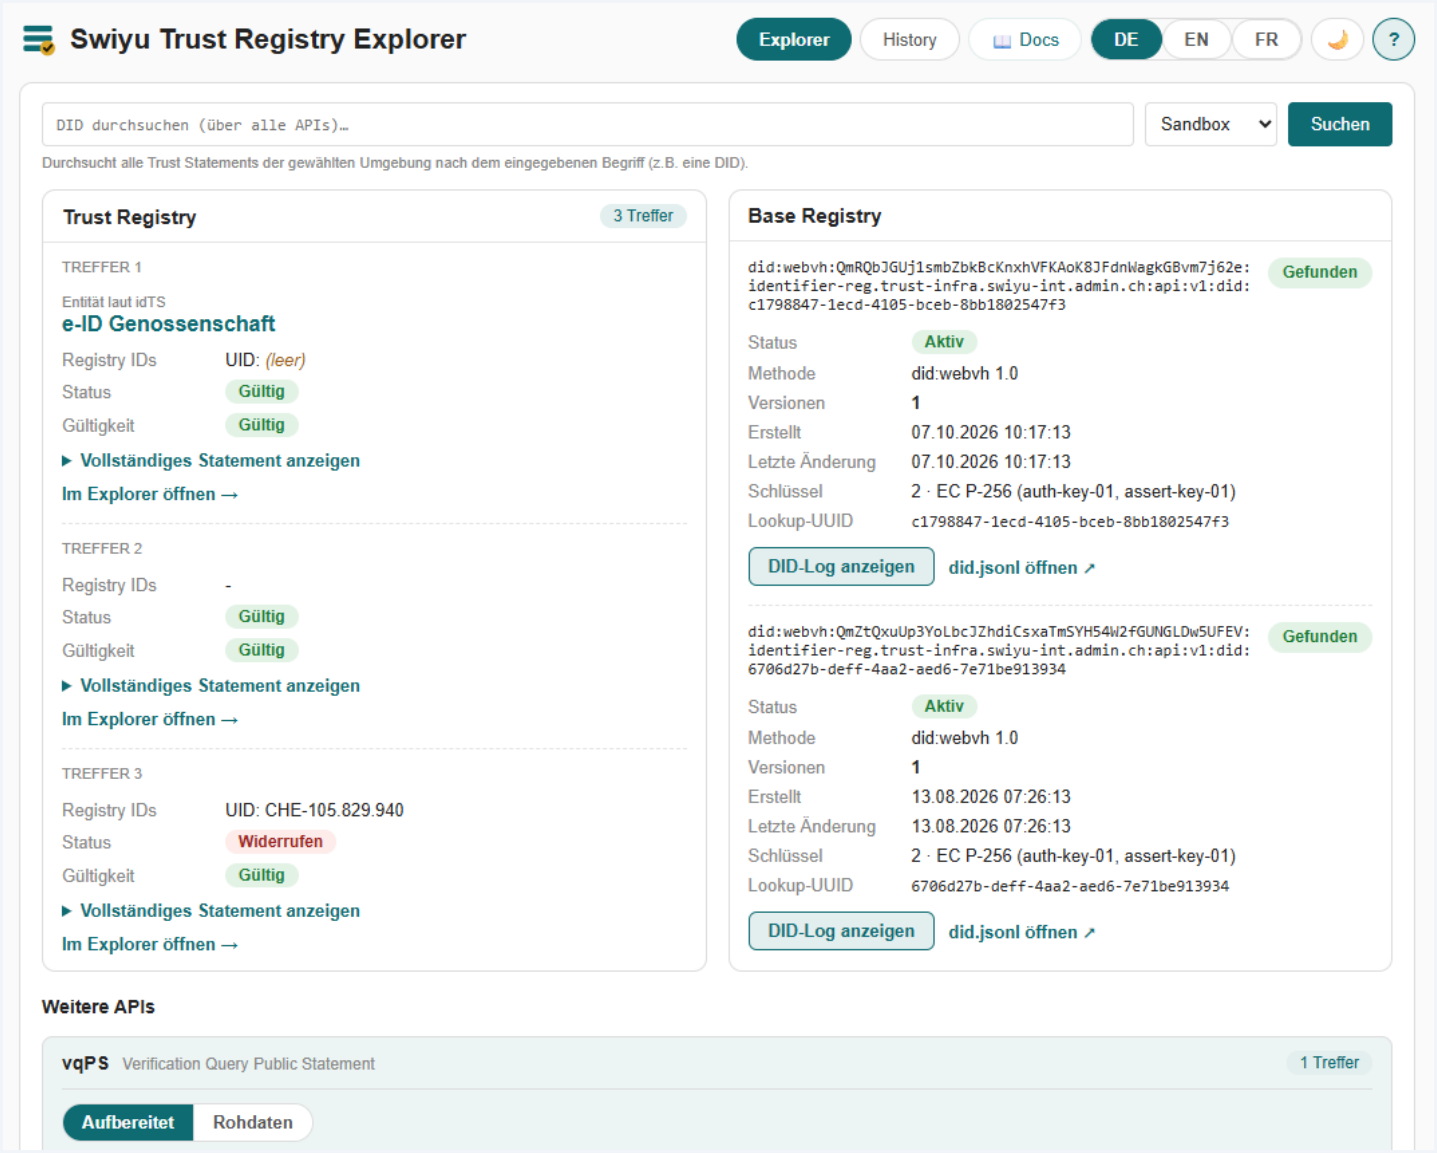

➔ Further contributions are very welcome.

➔ You can find these applications, along with test applications developed by other stakeholders in the swiyu ecosystem, in the “Show & Tell” discussion forum.

➔ https://github.com/orgs/swiyu-admin-ch/discussions/categories/show-and-tell

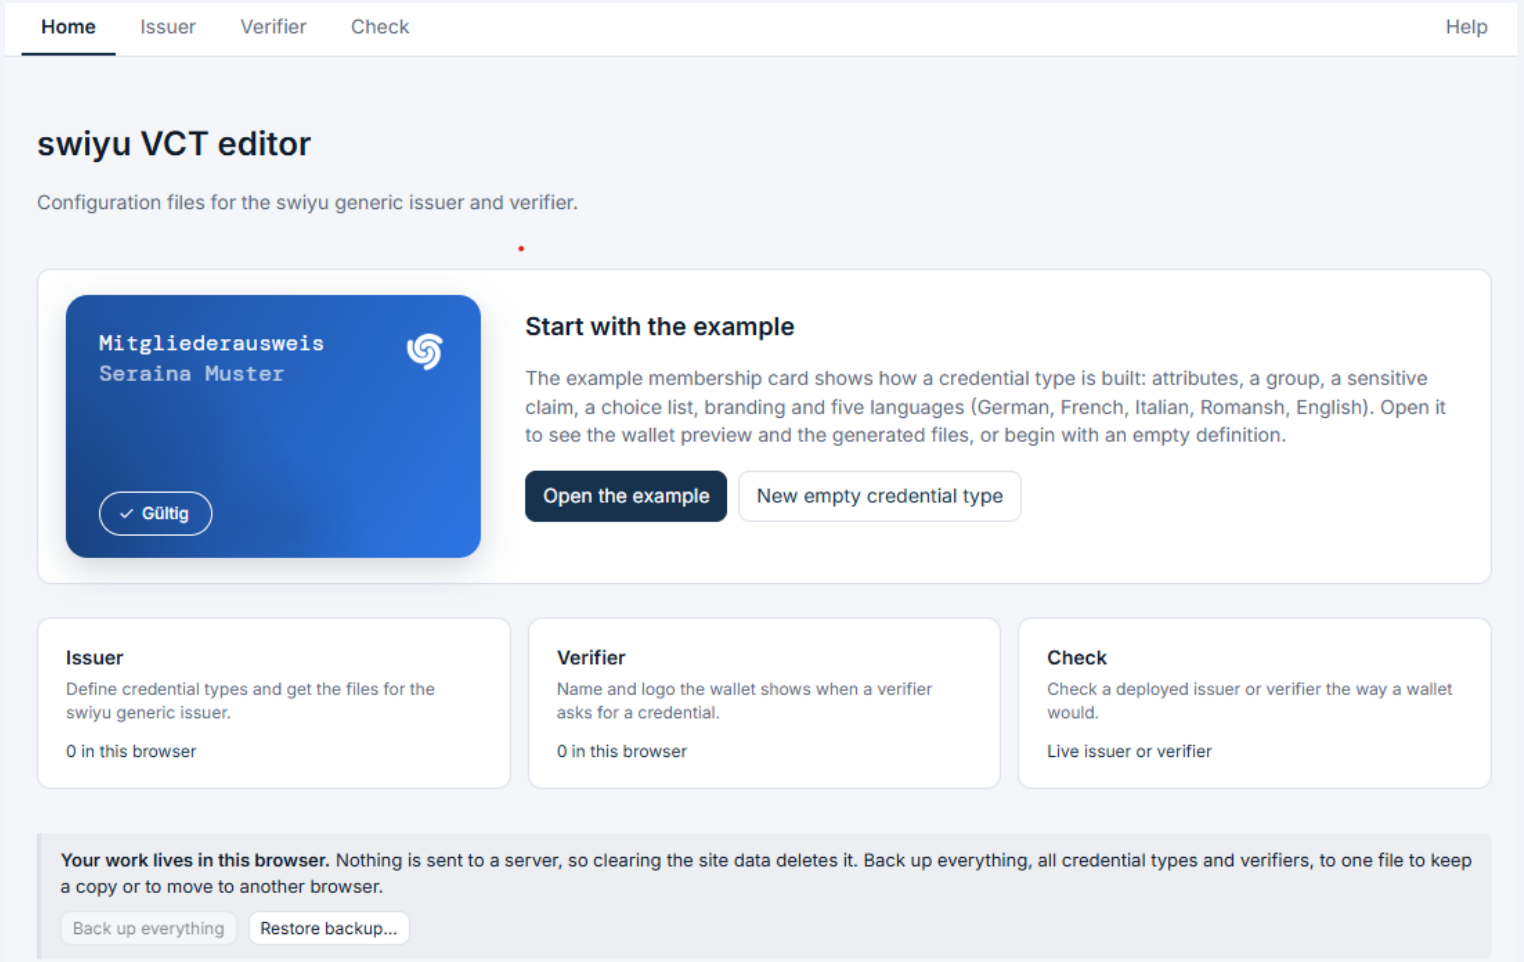

swiyu Trust Registry Explorer

- Check the status and validity of entries in the Base Registry and Trust Registry
- View DID log
- View Trust Statements
- https://www.trustexplorer.ch/

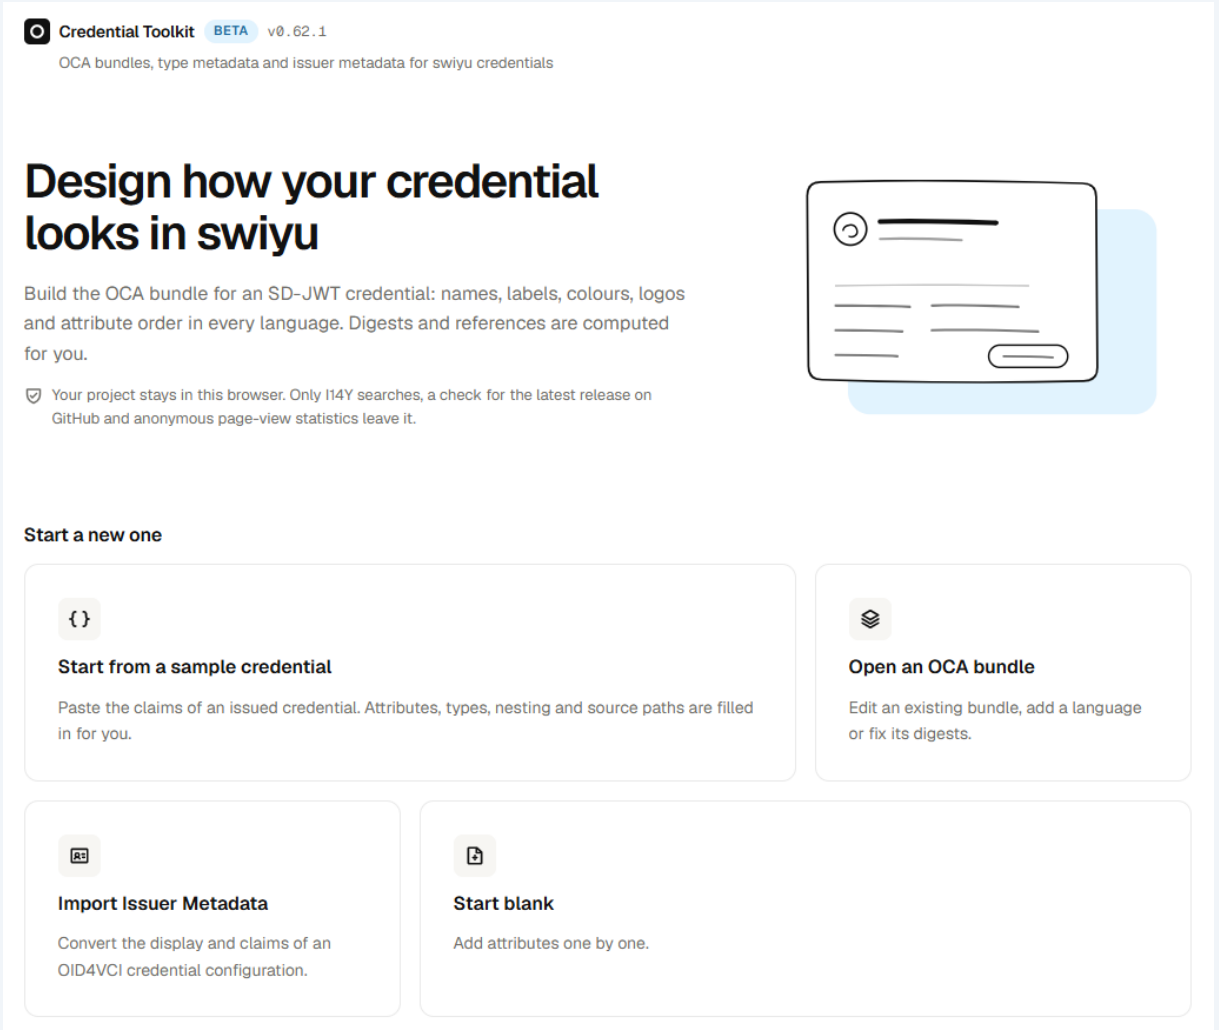

VCT Editor

- Generate a configuration for a generic Issuer and/or Verifier
- Start from a template or create a configuration from scratch
- Check deployed Issuer and Verifier instances
- https://vct-editor.unxos.ch/

Credential Toolkit

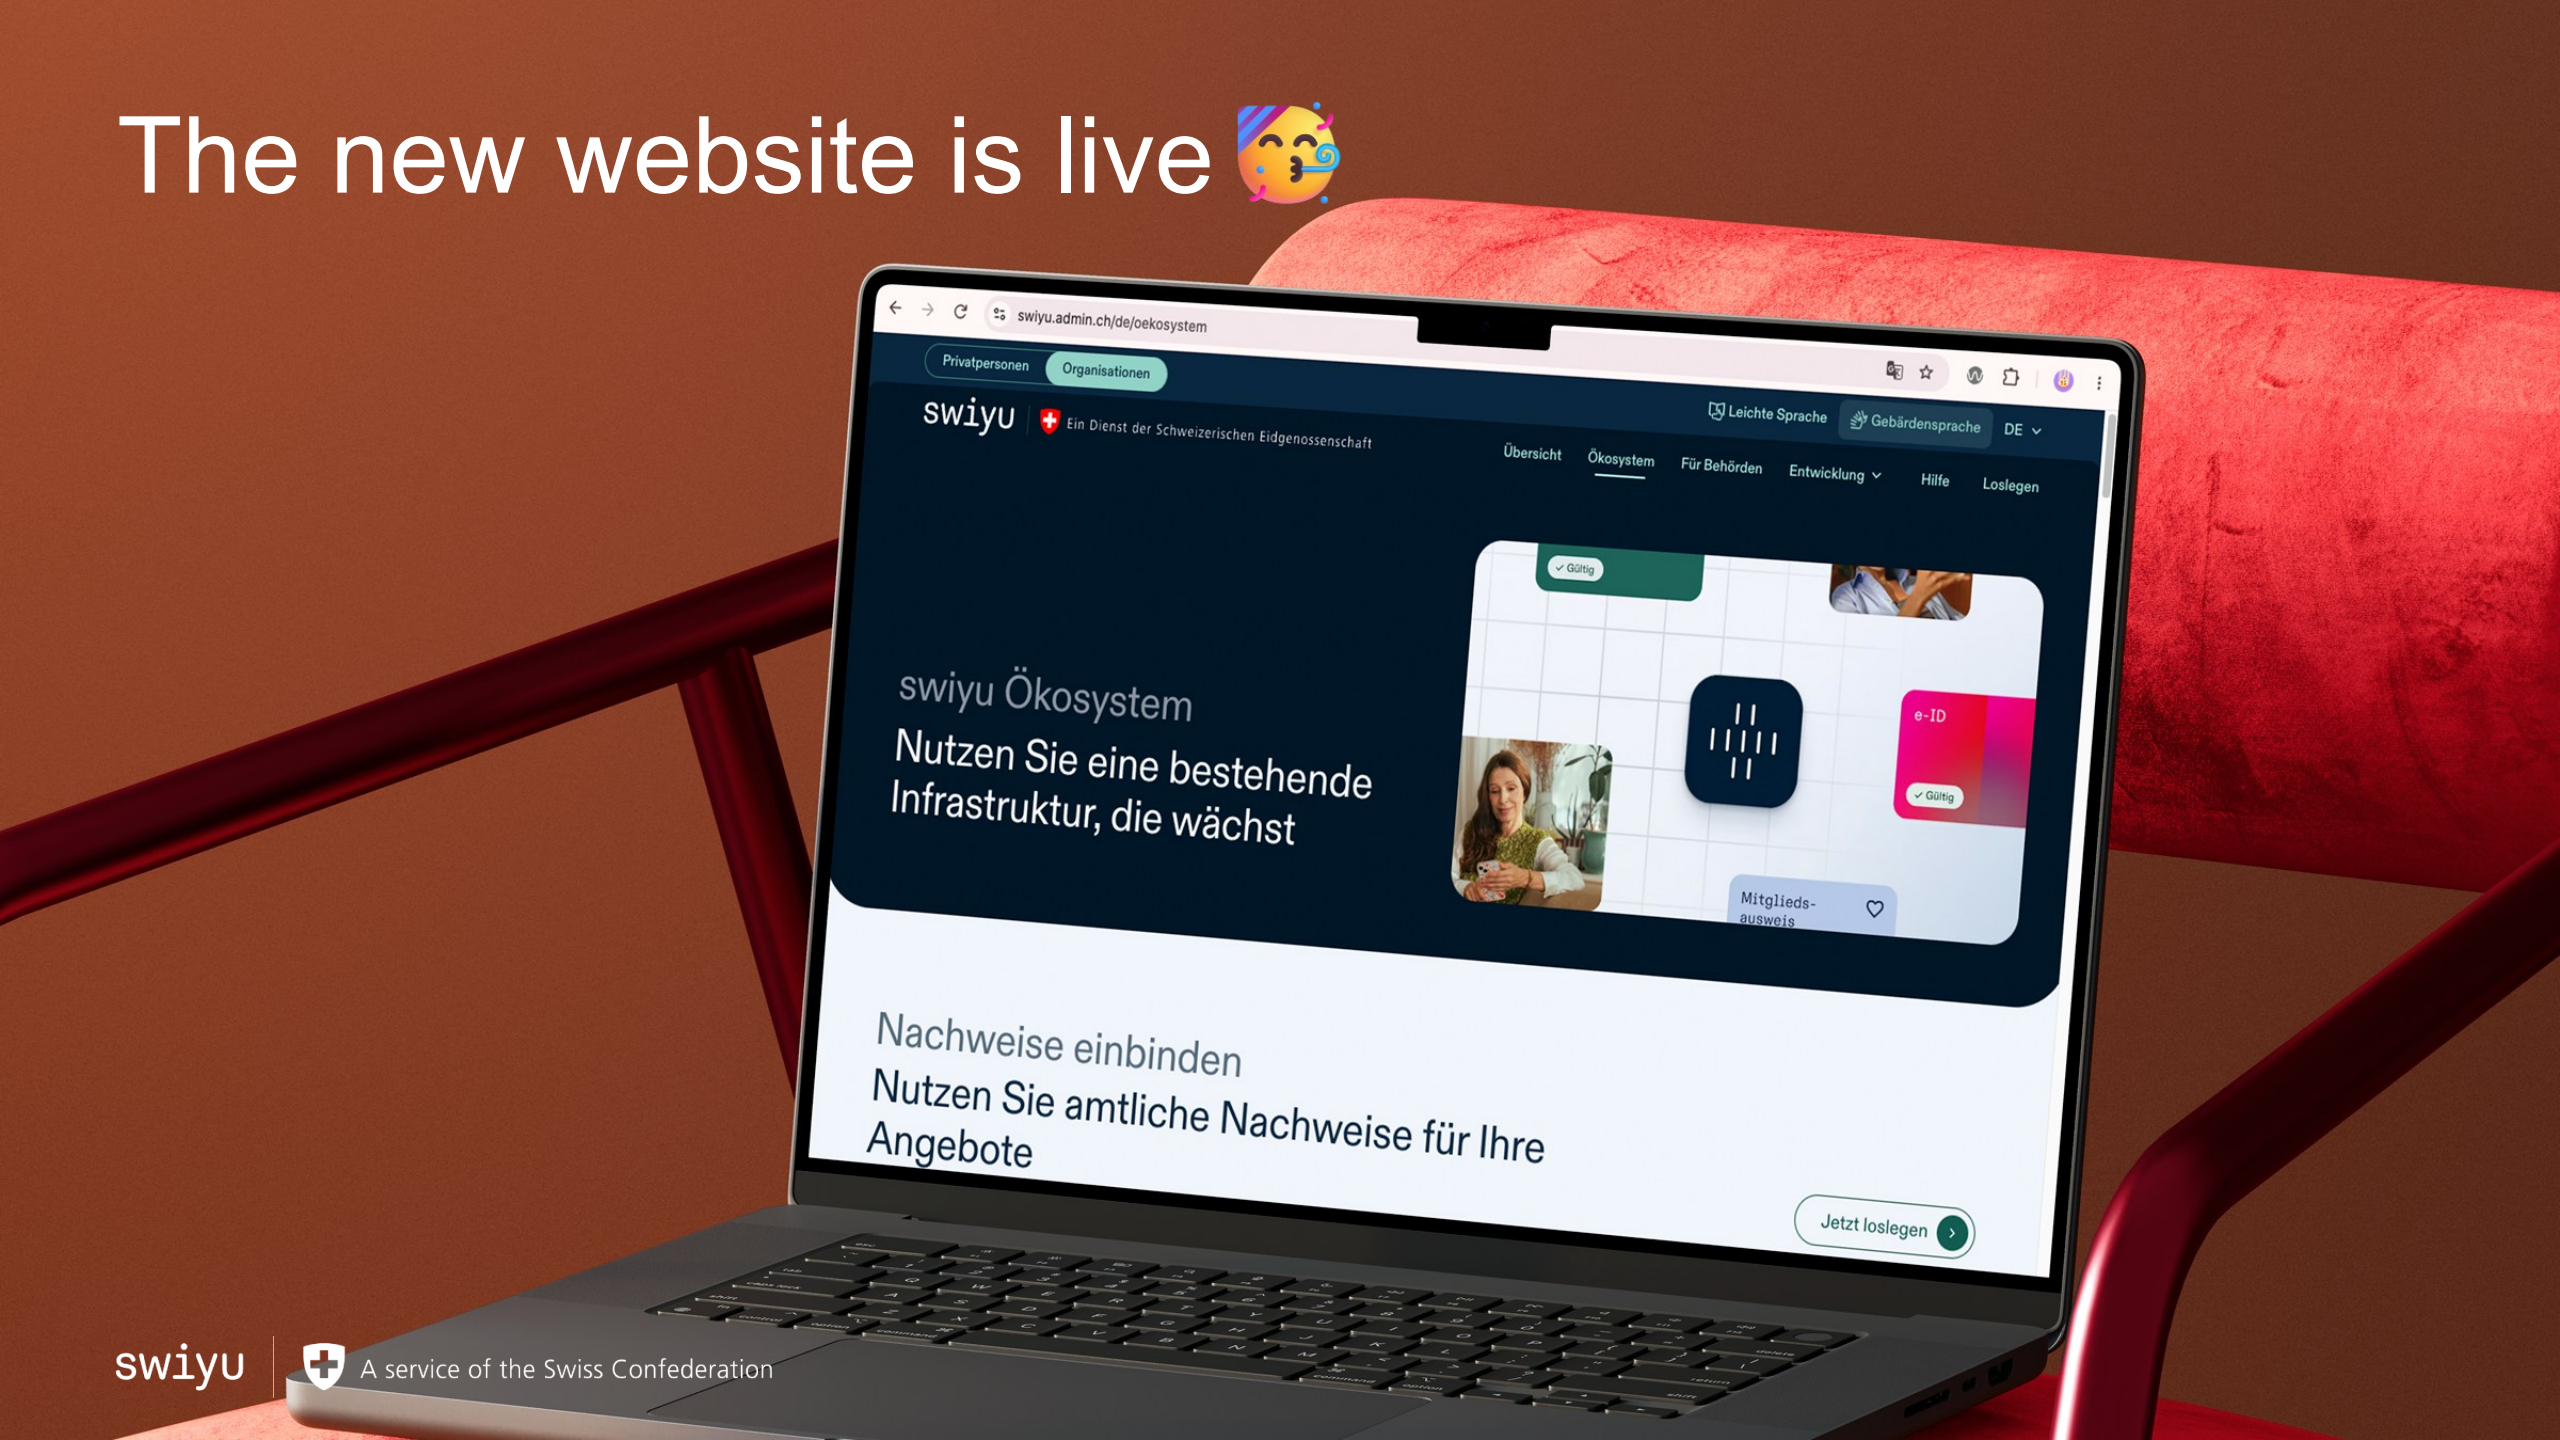

- Create the OCA bundle for an SD-JWT credential: names, labels, colours, logos and attribute order for each language
- Digests and references are calculated automatically
- Start from a template or create a bundle from scratch
- https://credential-toolkit.vercel.app/
