Agenda

- Welcome and agenda
- Internal testing phase
- Public beta status
- SSI simulation demo
- DIDAS – Trust Flow Diagrams
- Questions from the audience

Recording

The participation meeting will be recorded and published on YouTube.

The screenshot shows the YouTube channel page for 'swiyu'. At the top, there's a navigation bar with the YouTube logo, a search icon, a microphone icon, and a 'Anmelden' button. Below this is a banner for 'swiyu' with the text 'A service of the Swiss Confederation'. The channel's profile picture is a red circle with white vertical bars. The channel name 'swiyu' is displayed, along with the handle '@swiyu-admin-ch', 131 subscribers, and 37 videos. The description mentions 'Elektronische Identität und Vertrauensinfrastruktur ...mehr'. Below the description are links to 'eid.admin.ch/de' and '2 weitere Links'. A large black 'Abonnieren' button is prominent. The navigation tabs 'Übersicht', 'Videos', and 'Playlists' are shown, with 'Playlists' being the active tab. Under 'Erstellte Playlists', two playlists are visible: 'Introduction à l'e-ID et l'infrastructure de confiance' dated '20.03.2025' with '2 Videos', and 'Participation meeting executive summary in English' dated '04.07.2024' with '5 Videos'.

Participation meeting, June 2026

Internal testing phase

Rolf Rauschenbach

Internal federal test stage for online issuance

- Before the launch of the e-ID, the **online issuance process** will be **tested** on a large but limited scale within the federal government.
- Target group: **Federal government employees** (approx. 40,000 people)
- The legal basis is Article 34 para. 4b DSG.
- The e-IDs will be issued in the **production environment**
- These **(test) e-IDs** will be **revoked** before the law comes into force.
- The number of test persons will be increased **gradually** (e-ID > FOJ > fedpol > FOITT > all federal administrative units)
- Test period: **July 2026** until launch

Internal federal test stage postponed

- **Work** on the introduction of the e-ID is **ongoing**.
- The focus is on the adjustments announced in the press release of 25 February 2026, which are designed to further **strengthen data protection** and the **reliability of e-ID and the associated infrastructure**.
- These have only been **partially completed**, which is why the internal federal administration **test phase** planned for July 2026 is **being postponed**.
- **It is possible that the introduction of e-ID will be delayed.**

Public Beta

André Kunz

New releases

New swiyu Wallet versions for Android 1.15 and iOS 1.16

- EMC Contract: Enforce DCQL Presentation
- EMC-Expand for new credential format
- EMC-Expand for new DID standard and Swiss Profile versioning
- Invalid credentials can no longer be presented

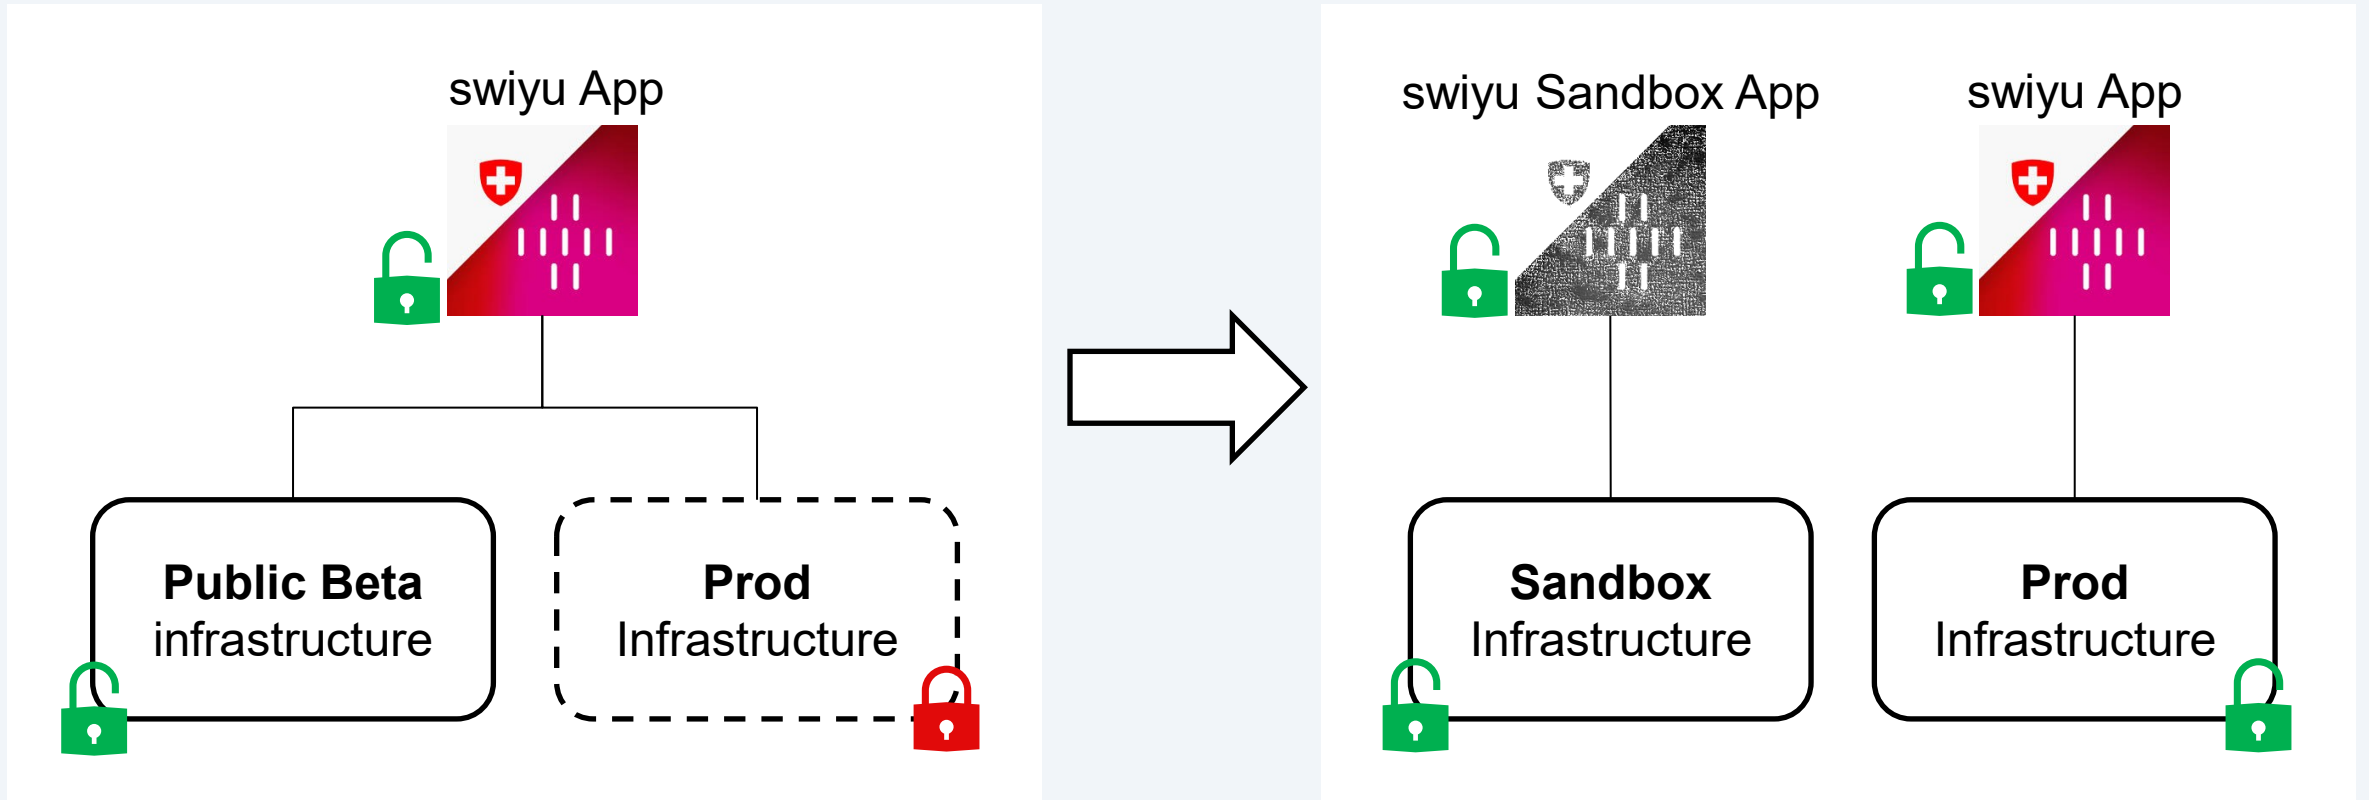

DID Toolbox Version 2.1.0

- New standard did:webvh (in accordance with Swiss Profile Anchor 1.0)
- Swiss Profile version in DID log
- New DIDs can be resolved using the “latest” Resolver 2.8.0

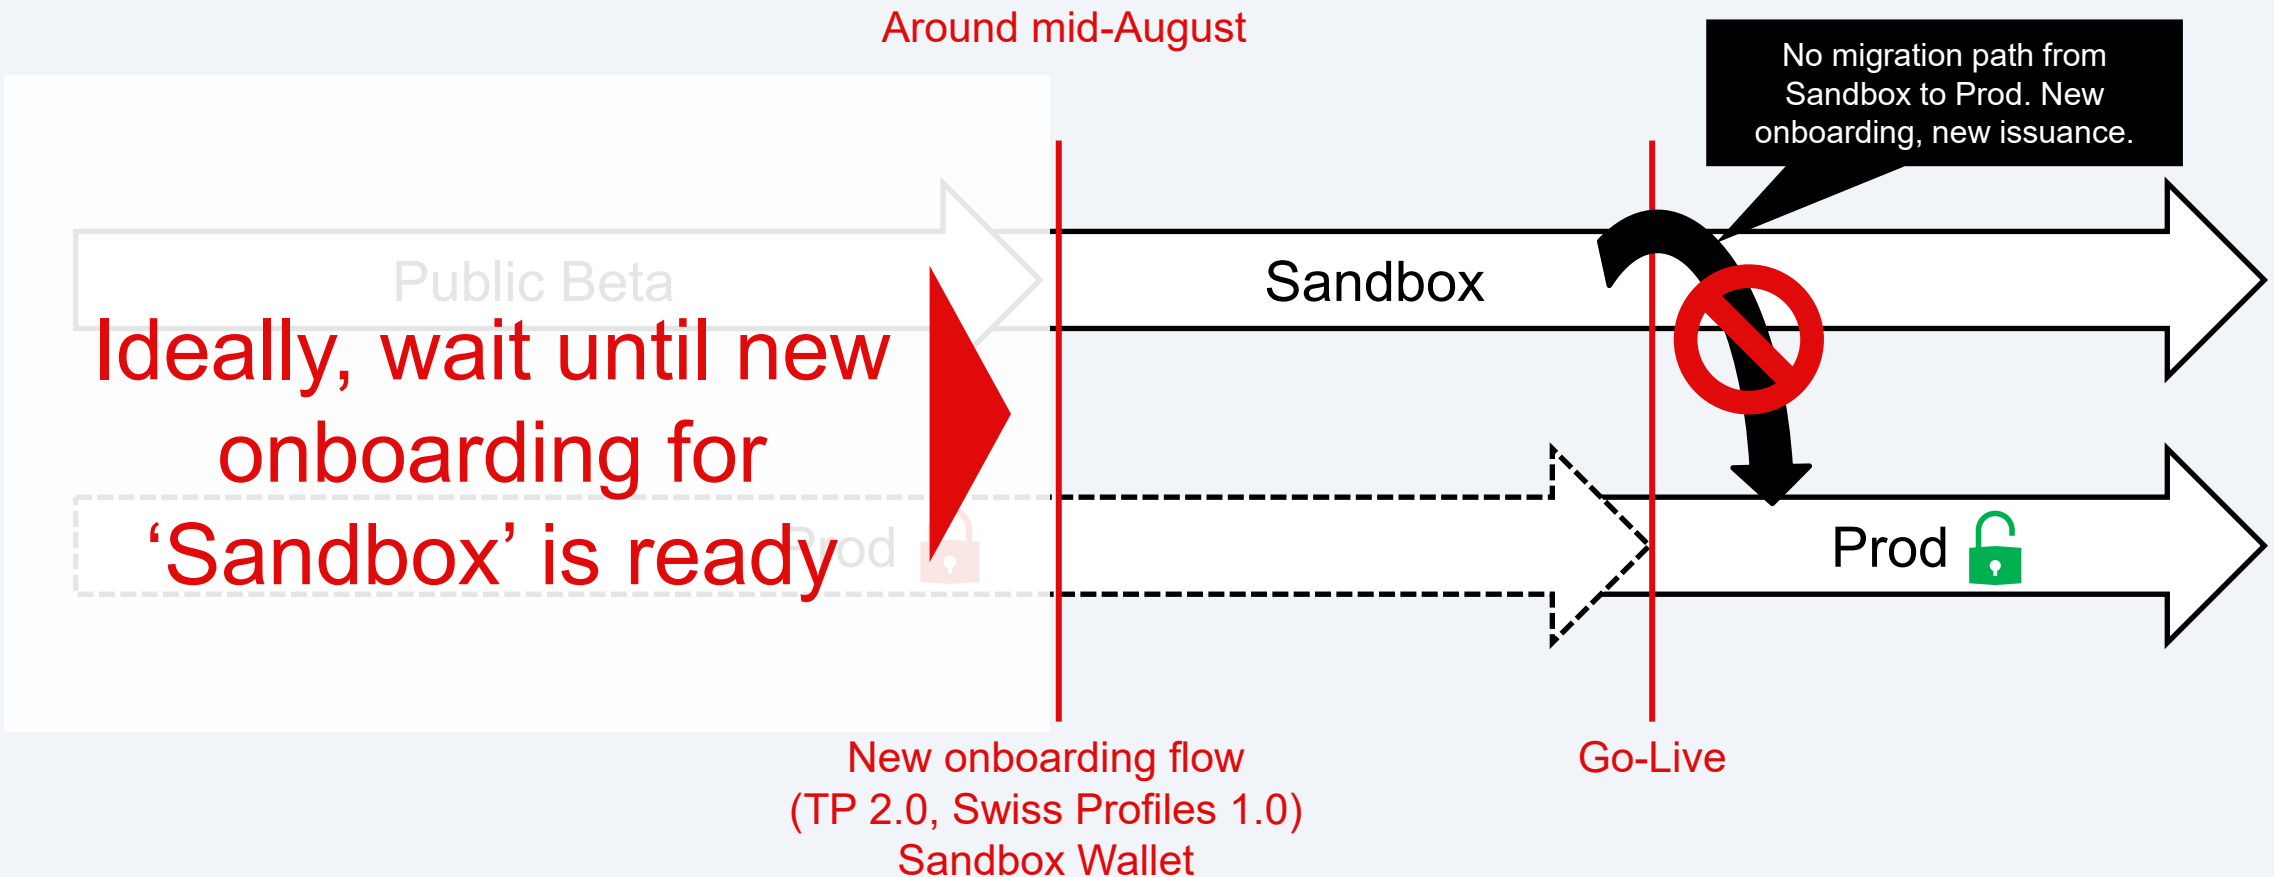

DID Resolver Version 2.8.0

- Bug-fixing of known vulnerabilities

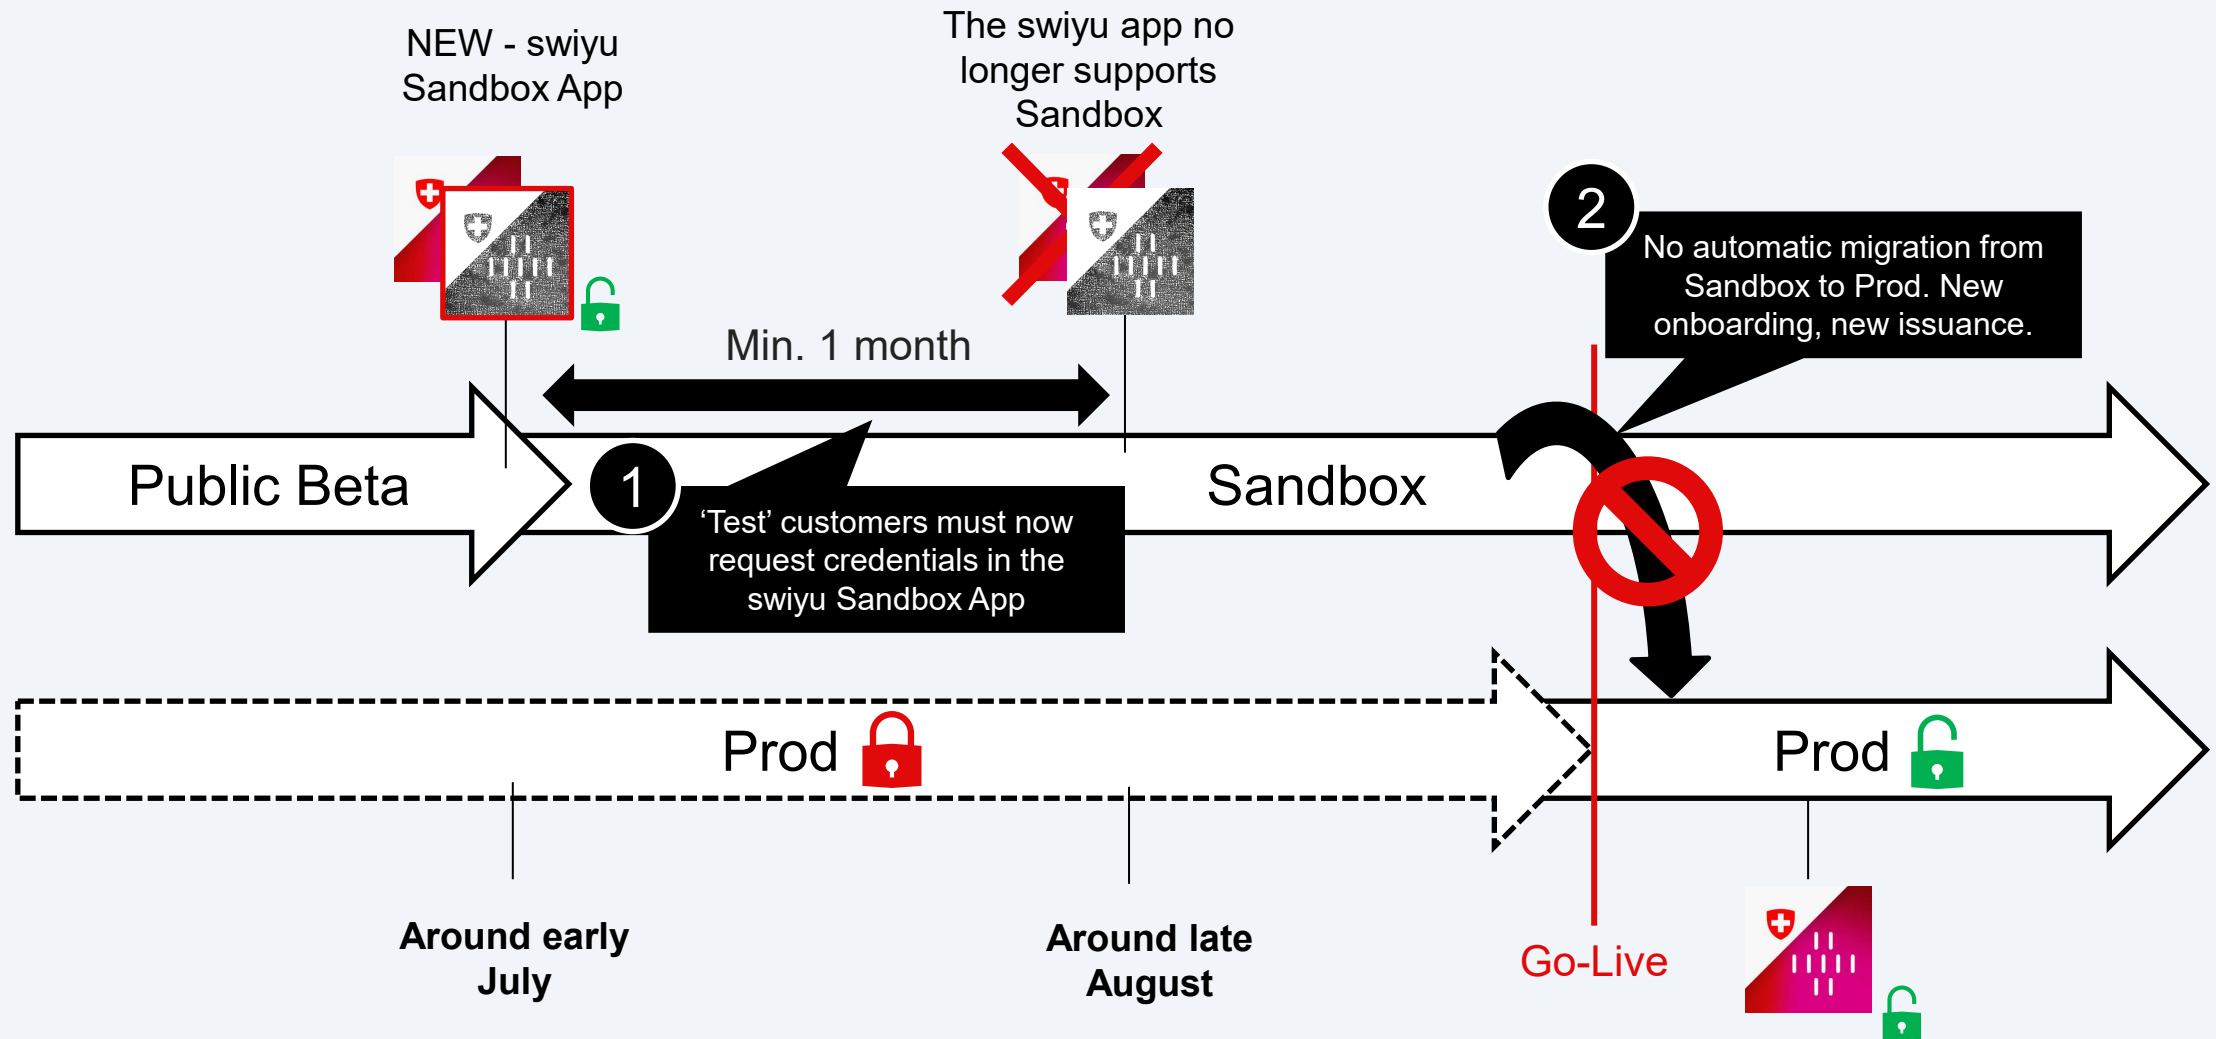

'Public Beta' becomes 'swiyu Sandbox'

Important for potential newcomers

Important for current issuers and verifiers

Todo's for Sandbox and Prod

Issuer:

1. Use the new onboarding flow for registration in the Base- and Trust-Registry
 - a) Create a DID according to the new standard with DID-Toolbox 2.1.x
 - b) Store information for Trust Protocol 2.0
2. Create credentials with swiyu-issuer 3.1.x

Verifier:

1. Use the new onboarding flow for registration in the Base- and Trust-Registry
 - a) Create a DID according to the new standard with DID-Toolbox 2.1.x
 - b) Store information for Trust Protocol 2.0
2. Verify credentials with swiyu-verifier 2.3.x

When the production environment goes live, all users must re-register!

Credentials are valid either in the sandbox or in the production environment!

Planned system downtime on 25 June 2026

Due to internal system recovery tests, there may be interruptions to the swiyu Public Beta/Sandbox trust infrastructure on Thursday, 25 June 2026.

Information on system outages can be found on our 'System Status' channel at <https://github.com/orgs/swiyu-admin-ch/discussions/12>.

SSI Simulation Demo

Christian Probst, Canton of Basel

DIDAS – Trust Flow Diagrams
