Agenda

- Welcome and agenda
- Progress and Outlook
- Interaction between AGOV and e-ID
- The German EUDI ecosystem and sandbox
- Global Digital Collaboration: Progress and Outlook
- Questions from the audience
- Executive Summary in English (5 pm)

Recording

The participation meeting will be recorded and published on YouTube.

The screenshot shows the YouTube channel page for 'swiyu'. At the top, there's a navigation bar with the YouTube logo, a search icon, a microphone icon, and a 'Anmelden' button. Below this is a banner for 'swiyu' with the text 'A service of the Swiss Confederation'. The channel's profile picture is a red circle with white vertical bars. The channel name 'swiyu' is displayed, along with the handle '@swiyu-admin-ch', 131 subscribers, and 37 videos. The description mentions 'Elektronische Identität und Vertrauensinfrastruktur ...mehr'. Below the description is a link 'eid.admin.ch/de und 2 weitere Links' and a black 'Abonnieren' button. The navigation tabs are 'Übersicht', 'Videos', 'Playlists', and a search icon. The 'Playlists' tab is selected. Under 'Erstellte Playlists', there are two playlist cards. The first card is for 'Introduction à l'e-ID et l'infrastructure de confiance' dated '20.03.2025' with '2 Videos'. The second card is for 'Participation meeting executive summary in English' dated '04.07.2024' with '5 Videos'.

Progress of the work & Outlook

Rolf Rauschenbach, FOJ

Media release from June 30, 2026

New Timeline for the Introduction of the e-ID and the Trust Infrastructure

The latest developments in the field of artificial intelligence present additional challenges for the creation of an electronic identity (e-ID). To ensure that user data protection and security are maintained, further work is needed, which will delay the introduction of the e-ID. The security aspect must be given greater priority than introducing e-ID by the originally stated date. Regardless, the trust infrastructure is expected to become operational in the first half of 2027.

What are the implications for swiyu?

In the first half of **2027**

- Partial implementation of the **e-ID Act**
- Launch of the **trust infrastructure**
- Entries in the **base registry** are available to everyone
- Entries in the **trust registry** are available to all Swiss authorities and to legal entities with an UID
- The **swiyu Wallet** is available
- **Other digital credentials** can be issued and verified (for example the mDL for new drivers)
- Previously issued **eLDP** credentials will continue to function
- **Test credentials** issued on Public Beta will no longer function. Test credentials must now be issued from the Sandbox environment into the Sandbox swiyu Wallet

What are the implications for the e-ID?

The latest developments in the field of **artificial intelligence** (AI) present additional challenges for the development of the e-ID. For this reason, the Federal Office of Justice (FOJ) has decided to **further enhance security in the online issuance process**. The implementation of additional technical measures is intended, for example, to make it more difficult to introduce malware onto end-user devices and to improve the detection of deepfakes.

These solutions are currently being further refined by an interdepartmental working group led by the BJ. However, the necessary adjustments will take time, which is why the introduction of the e-ID has been postponed. The BJ is also currently assessing the impact on resource requirements. **The exact date for the introduction of the e-ID will be announced as soon as this work is largely complete.**

Global Digital Collaboration: Progress Report and Outlook

Rolf Rauschenbach, FOJ

What is Global Digital Collaboration?

A neutral platform for public and private sector stakeholders

Promoting collaboration in the digital sector, in particular

- Wallets and credentials
- Cyber security
- Artificial intelligence

What is the role of the federal government, and why?

The Federal Government is – in the spirit of good offices and multilateralism – the host

Immediate objectives from the perspective of the e-ID programme

- Fostering relationships with relevant stakeholders to resolve immediate problems
- In the medium term: interoperability of the trust infrastructure

Overarching objectives from the Federal Government's perspective

- Digital sovereignty
- Digital host nation

What does the GDC Council do?

The GDC Council advises the Federal Government in particular on:

- Strategy
- Selection of co-organisers for the GDC Conference
- Agenda for the GDC Conference and the GDC High-Level Meeting
- Budget and fundraising
- Special projects

Who is represented on the GDC Council?

Countries

Brazil (Chair)
China
Germany
France
Canada
Switzerland
Singapore
United Kingdom

IGOs

- AU
- EU
- UNHCR
- UNESCO
- World Bank Group (Chair)

Companies

- Ant Group
- Apple
- Consensys
- Google (Chair)
- Huawei
- Mastercard
- Microsoft
- Samsung
- Visa
- Yubico

NGOs

- FIDO Alliance
- Gates Foundation
- GSMA
- IATA (Chair)
- IIF
- IFPMA
- ISOC
- Linux Foundation
- Mozilla
- World Wide Web Consortium

What do GDC task forces do?

- Work on specific topics with a deadline
- Always co-lead with one public and one private sector organization

Current GDC task forces

- Age Assurance (Brazil, Google)
- Trust Registries (France, Apple)
- Device API for ID Solutions DAISi (Germany, GlobalPlatform)

GDC Conference 2026

- 1–3 September 2026
- Palexpo, Geneva
- Day 1: Keynotes and panels (GDC Council, GDC Task Forces, Corridors), already published
- Days 2 and 3: Over 100 sessions, to be published in early August
- Attendance by invitation only and free of charge
- [Information](#)
- [Registration](#)

GDC Conference 2026: Co-organisers

- Advocacy Group: Blockchain Commons, CDPI, PolicyLab Africa, IFED
- Blockchain Group: BGIN, Blockchain Bundesverband e.V, Ethereum Climate Platform, LNet
- Car Connectivity Consortium
- CEN CENELEC
- Cloud Signature Consortium
- Connectivity Standards Alliance
- COVESA
- Creative Commons
- DAMA and Open Ownership
- Decentralized Identity Foundation
- DPI Group: Aapti Institute, Interledger Foundation, MOSIP, Networks for Humanity
- Eclipse Foundation
- EMVCo
- ETSI
- EUDIW Group: Aptitude, We Build
- FIDO Alliance
- FIRST
- GLEIF
- GlobalPlatform
- GSMA
- IATA
- ID Associations Group: APDI, Asia PKI Consortium, DIACC, DIDAS, FIDES, TeleTrust
- IEC
- IEEE
- ISO
- ISOC
- Linux Foundation
- mDL Group: AAMVA, Austroads, EReg
- OpenID Foundation
- Research Organizations Group: EPFL, GEANT, Miles College, TNO
- UNECE and International Trade Centre
- UNESCO
- United Nations Environment Programme
- United Nations International Computing Centre
- W3C
- World Bank Group
- World Health Organization

A bientôt à Genève!
