Agenda

- Welcome and agenda
- Legislation update
- Public Beta status
- System demo
- Questions from the audience
- Executive Summary in English (6 pm)

Recording

The participation meeting will be recorded and published on YouTube.

The screenshot shows the YouTube channel page for 'swiyu'. At the top, there's a navigation bar with the YouTube logo, search, and login options. Below this is a banner for 'swiyu' with the text 'A service of the Swiss Confederation'. The channel profile section includes a circular logo with a grid of vertical lines, the name 'swiyu', the handle '@swiyu-admin-ch', 131 subscribers, and 37 videos. A description in German is partially visible. Below the profile is a link to 'eid.admin.ch/de' and a 'Abonnieren' (Subscribe) button. The navigation tabs at the bottom are 'Übersicht', 'Videos', 'Playlists', and a search icon. The 'Playlists' tab is selected, showing a list of created playlists. The first playlist is titled 'Introduction à l'e-ID et l'infrastructure de confiance' with a date of '20.03.2025' and '2 Videos'. The second playlist is titled 'Participation meeting executive summary in English' with a date of '04.07.2024' and '5 Videos'.

Participation meeting May 2026

Legislative status

Urs Paul Holenstein

The vote will not be repeated

- On 21 April 2026, the Federal Supreme Court decided by a vote of 3 to 2 not to consider the final pending electoral appeals on procedural grounds (the three-day deadline for lodging an appeal had been missed).
- In a subsequent step, the Federal Council formally confirms the result of the vote (certification). The certification decision is published in the Federal Gazette.
- The Federal Council will decide on the entry into force of the e-ID Act and the implementing provisions, scheduled for 1 December 2026, in autumn 2026 at the earliest.

Public Beta

André Kunz

Overview

- New releases
 - Beta Credential Service (BCS)
 - swiyu Android & iOS Wallets
 - swiyu Issuer
- Designs for the new 'Swiss Profiles'
- Outlook

New BCS release

- Contains the next steps regarding further development of 'Swiss Profiles 1.0'.
- This release requires swiyu Wallet versions iOS 1.15.0 and Android 1.14.0 and is not backwards compatible with older versions of the swiyu Wallet.
- Key changes:
 - New vct metadata claims: (vct_version, vct_metadata_uri, vct_metadata_uri#integrity)
 - Issuer metadata expanded with a new element 'credential_metadata', which contains the information 'display' and 'claims'
 - Major upgrade to swiyu-issuer version 3.0.3
 - Minor upgrade to swiyu-verifier version 2.3.3
 - Optional payload encryption during issuance

Wallet versions: iOS 1.15.0 & Android 1.14.0

- iOS: Now only supports devices running iOS 17 or later
- 'Contract' step for new credential metadata structure
- 'Contract' step for 'Access-Token-Request uses wrong Content-Type' and 'Wallet sends token endpoint parameters as query parameters'
- Fix: "Fetch Issuer Configuration well-known path not default"
- The changelog is now published under the respective release on GitHub

Swyiu Generic Issuer

- New major version of the swyiu Generic Issuer for the implementation of OID4VCI V1.0
- ‘Contract’ steps (possibly ‘breaking changes’):
 - ‘c_nonce’ has been removed from ‘OAuthTokenDto’; the nonce can now be retrieved via the nonce endpoint.
 - The “nonce” column in the “credential_offer” table has also been removed.
 - Obsolete OID4VCI Draft-13 endpoints have been removed
 - Support for did:jwk has been removed
- Further fixes and new features can be found in the changelog on GitHub.
- We have provided a migration guide on GitHub for upgrading from version 2.4.x to 3.0.x.

New 'Swiss Profiles'

- 7 specific Swiss Profiles instead of a single profile
- Each profile contains the specifications relevant to a specific area
- One or more permitted versions for each specification
- Profiles contain implementation notes and identified gaps where behaviour deviates from the underlying specifications
- Drafts published at <https://swiyu-admin-ch.github.io/specifications/>

Swiss Profile	Specifications
swiss-profile-trust	• Trust Protocol CUSTOM • Non-compliance Protocol
swiss-profile-anchor	• DID Core • DID:webvh
swiss-profile-vc	• Token Status List • SD-JWT • SD-JWT-VC • OCA • Visualization of Verifiable Credentials with OCA CUSTOM
swiss-profile-issuance	• OAuth 2.0 DPoP • OpenID4VCI
swiss-profile-verification	• OpenID4VP • JAR
swiss-profile-proximity	• mDL ISO-18013-5 BLE
swiss-profile-portability	Wallet Backup Container CUSTOM

Outlook:

- Continuous development in line with the ‘EMC Pattern’ towards Swiss Profiles 1.0.
- swiyu-issuer and swiyu-verifier 3.x
- Issuance: Mandatory payload encryption
- Verification: Response mode “direct_post.jwt” with mandatory payload encryption
- Verification: Removal of the DIF Presentation Exchange
- New value for claim “vct”: “urn:vct:ch.admin.bcs.betaid” (previously: “betaid-sdjwt”)
- New DID according to “did:webvh” (previously: “did:tdw”).
- Channels for release announcements
 - GitHub “Discussion”: <https://github.com/orgs/swiyu-admin-ch/discussions/11>
 - swiyu technical documentation: <https://swiyu-admin-ch.github.io/release-announcements/>

System Demo

Agenda

- swiyu Brand Manual
- swiyu.admin.ch
- Transparency & Report misuse
- Onboarding flow Trust infrastructure
